

2026

CORPORATE PRESENTATION

- Established in 2007, driven by engineering excellence.
- Manufacturing in Gaziantep, a historic crossroads of the Silk Road.
- Built on international standards, uncompromising quality and operational excellence.
- Trusted across more than 48 countries worldwide.
- Committed to sustainable growth and long-term partnerships.

DEALERS & DISTRIBUTION PARTNERS

Russia — Transit-Don (Транзит-Дон)
United Arab Emirates — GASNEEDS TRADING LLC

ISO 9001:2015

CRS Certificate

TR-098-00241-certificate

LPG

- Semi-trailer tankers
- Industrial storage tanks
- Transport tanks (BOBTAIL)
- SKID systems
- Aboveground & underground tanks
- ISO tanks

Ammonia

Tipper Semi-Trailer

Container Carrier

Project Based

- Air receiver tanks
- Solution tanks
- Gas Cylinder Carrier

- Capacity: 35–70 m³
- Standards: ADR, EN 12493, TPED
- An LPG trailer is specifically designed for the safe transportation of Liquefied Petroleum Gas (LPG) over long distances

- Chassis-mounted road LPG transport
- Commonly used for the distribution of LPG to households, autogas stations, and commercial sites.
- Standards: ADR, TPED, EN 12493
- Capacity: Flexible, tailored to customer needs

GUINEA-TTS SARLU Project

- Standards: EN 13445, PED
- Custom design: AD2000, ASME upon request
- Suitable for international transport of LPG, LCO₂, ammonia, and other chemicals by road, rail, or sea.

- Aboveground & underground installation
- Standards: EN 13445, PED
- Designed for bulk LPG storage at industrial facilities, cylinder filling plants, and energy stations.
- Custom design: AD2000, ASME upon request

- Aboveground & Underground Installation
- Capacity Range: 1.8 m³ to 10 m³
- Standards: EN 13445, PED
- Designed for bulk LPG storage and supply in hotels, restaurants, hospitals, residential complexes, villas, and other commercial facilities.
- Suitable for both domestic and commercial LPG applications.
- Custom design: ASME upon request.

(East Africa Project)

- Compact LPG storage + dispensing system
- Easy installation, movable design
- Ideal for mobile LPG filling stations and remote areas where quick installation is required.

(Central Asia Project)

- Capacity: 30–50 m³
- Standards: EN 12493, ADR, AD 2000
- Used for the safe transportation of liquid ammonia in industrial and agricultural applications.
- Manufacturing on demand: ASME, other standards

- Custom lengths: 20ft / 30ft / 40ft / 45ft
- High-strength steel construction
- Used for the efficient transportation of ISO tanks, containers, and pressure vessels by road.
- ADR-certified and optimized for LPG & chemical tank transport
- Flexible design for Ro-Ro & flat-rack shipping

- Custom lengths: 20ft / 30ft / 40ft / 45ft
- High-strength steel construction
- Used for the efficient transportation of ISO tanks, containers, and pressure vessels by road.
- ADR-certified and optimized for LPG & chemical tank transport
- Flexible design for Ro-Ro & flat-rack shipping

- Volume range: 5,000 – 100,000 liters
- Resistant to corrosion and chemical reactions
- Designed per EN 13445 / ASME / AD 2000
- Available in carbon steel, stainless steel, or coated options
- Used for the storage and preparation of chemical solutions, liquids, and water treatment processes.

- Volume range: 10.000 – 50,000 liters
- Material: High-quality carbon steel or stainless steel
- Standards: PED, ASME, EN 286-1
- Designed to store compressed air and stabilize pressure in industrial and manufacturing systems.

- Capacity: 22–28m³, customizable according to requirements
- Body & Chassis: HARDOX high-strength steel body / S355J2 chassis
- Axles & Equipment: 3 × 9,000 kg axles, air suspension, EBS and ADR-compatible options
